About Company

Founded in 1989 by Venkat S R Atluri, Hyderabad-based Sun Atluri has progressively evolved into an acclaimed architectural lighting consultancy breathing visual life into diverse spaces.

The founding seeds were sown identifying the need for a specialized player catering to interior decoration materials including carpets, curtains, sown etc., back in the 1980s. Operations commenced through the import & distribution of premium home furnishings, subsequently expanding into customized signages.

Siddharth Atluri's addition to Atluri & Associates marked a turning point. With a B.E. from Bits-Pilani, Dubai, an M.S. in Engineering Management from the University of Houston, & a Master's in Architectural Lighting Design from Hochschule Wismar, Germany, he identified a white space in the industry. His studies revealed the need for a consultancy that transforms lighting from a functional element to an experiential aspect, underscoring aesthetics. This realization drove the firm's new direction, bridging the gap between functionality and aesthetics in architectural lighting design.

Thus emerged Sun Atluri's true calling as an integrated lighting design house. Today, cross-functional team offers bespoke solutions right from lighting schemes, site audits, concept presentations down to product procurement and execution facilitation across sectors. Signifying knowledge depth are renowned partners like L&T, Blue Star, Ramoji Film City, Jayabheri, Phoenix, GMR, My Home, Sattva Salarpuria, and VamsiRam etc., actively choosing us for their showpiece venues.

At the core of lighting excellence lies an in-depth understanding of attributes from space, depth, CCT, lux levels, color rendering index (CRI), beam angles to control gear accurately articulating space-specific vision. We invest extensively through industry events and continuing education to refine perspectives. Likewise, finest visualization tools and latest catalogues access enable customized deliveries factoring changing LED advancements.

Having lit up prominent landmarks, our next milestone focuses on reaching international shores to inspire global architects while collaborating on iconic public.

Our Services

At Sun Atluri, we offer a full spectrum of architectural lighting design services to infuse spaces with functional, technical and architectural beauty. Our expert design team leverages cutting-edge tools & deep domain knowledge to conceive bespoke lighting solutions tailored to our clients' unique needs and vision.

From ideation to flawless execution, we provide complete support across your project lighting journey:

Lighting Design Consultancy: We conduct comprehensive audits and provide recommendations to shape aesthetically appealing, compliant lighting schemes per specifications.

Concept Presentations: We utilize advanced visualization to craft immersive presentations that bring your ideas to life guided by the latest innovations.

Product Procurement: We tap into our extensive network to source best-fit, quality solutions on time and on budget.

Execution Facilitation: We oversee on-site implementations to ensure seamless lighting setup and provide technical support as required.

Lighting Audits and Retrofits: We assess existing systems, identify upgrade opportunities, and deliver efficient lighting retrofit solutions.
